

Caring for your board...

Washing:

- Wash your board with warm water and dish soap, scrubbing lightly.
- DO NOT let board soak in water.
- Avoid over scrubbing as it removes the oils and waxes in the board.
- Towel Dry and stand board on edge or on a wire rack to dry thoroughly.
Laying board flat on a solid surface while damp causes moisture to get trapped and can warp the board.

Conditioning the wood:

- Use the included conditioner when the board starts to look dry or after repeated washes.
- Start with a clean dry board. Apply liberal amount of Wood Conditioner with a clean, soft cloth using circular motion, making sure to work it into all areas.
- Set aside and allow conditioner to soak in and dry for an hour or longer if desired.
- If necessary, reapply conditioner if board still appears dry.
- Buff board with a clean, soft cloth to remove excess wax and oil.
- Your board is now ready to use!
